Seeking CS PhD Position in Trustworthy AI

Education

National Yang Ming Chiao Tung University (NYCU) *Feb. 2021 - Sep. 2023*

MSc in Computer Science and Engineering

- **GPA: 4.2/4.3**
- Enriched Vision Applications Lab (EVA), Advisor: Dr. Wei-Chen Chiu
- **Selected Courses:** Deep Learning and Practice (**A+**), Reinforcement Learning (**A+**), Selected Topics in Visual Recognition using Deep Learning (**A+**), Computer Vision (**A+**)

National Chung Cheng University (CCU) *Sep. 2017 - Jan. 2021*

B.S. in Computer Science and Information Engineering

- **GPA:** Overall: **4.18/4.3**, Major: **4.21/4.3**, Ranking: **1/43**
- Machine Vision and Learning Lab (MVL), Advisor: Dr. Chen-Kuo Chiang
- **Honors:** Presidential Honor Award * 6 (F'17, S'18, F'18, S'19, F'19, S'20), College Student Research Scholarship
- **Selected Courses**: Machine Learning (**A+**), Statistics (**A+**), Object-Oriented Programming (**A+**), Data Structure (**A+**), Automatic Car Based on Learning Algorithm (**A+**), Compiler Design (**A+**)

Research Experiences

Enriched Vision Application Lab, NYCU, *Advisor: Prof. Wei-Chen Chiu & Dr. Pin-Yu Chen* *Aug. 2021 - CURRENT*

Research Assistant

- Researching on Red-teaming tool for safe T2I model developer. *[arXiv'23]*
- Researched on salieny-guided masking as a novel data augmentation for contrastive-based vision SSL. *[WACV'24]*
- Researched on point cloud augmentation for non-color datasets. *[code]*

Machine Vision and Learning Lab, CCU, *Advisor: Dr. Chen-Kuo Chiang* *Mar. 2020 - Jan. 2021*

Undergraduate Researcher

- Researched on multi-target multi-camera vehicle tracking system. *[CVPRW'21]*
- Researched on applications for 6DoF robotic arms in calligraphy.

Selected Publications († indicates equal contribution)

Projects

3D Point Cloud Augmentation via SRN *Jan. 2022*

MediaTek Research Project *[code] [slides]*

- Design a 3D point cloud augmentation based on a novel view synthesis method, scene representation networks, and use PointNet to evaluate our augmented point clouds quality.
- Replace instance object id with image features from ResNet to apply our method on unseen objects and do interpolation later on.
- Proposed method is successful in ModelNet10 and generates the augmented data by intra-class interpolation with ShapeNet in the latent space of SRN encoder.
- Observe limitation of novel view synthesis method on non-textured data.

Reimplementation Challenge *Jul. 2021*

Reinforcement Learning *[code] [report] [slides]*

- Reimplement ICLR 2018 paper: MAXIMUM A POSTERIORI POLICY OPTIMISATION in Pytorch.
- Successfully replicate the results in Cartpole, Hopper and Acrobot in MuJoCo environment.

Generative Models as Data Augmentation *Sep. 2021*

Deep Learning and Practice *[code] [slides] [video]*

- Investigate image transformation by exploring walks in the latent space of GAN.
- Use GAN steerability as an data augmentation technique.
- Conclude that GAN steerability is a better data augmentation technique compare to transformation done in the data space.

RSNA Pneumonia Detection *Jan. 2022*

Visual Recognition Using Deep Learning *[code] [report] [slides]*

- Design a two stage method, which first use a classification model to classify pneumonia, then use a detection model to locate the disease.
- Get the best results when using EfficientNet as classification model with 0.2 classification probability threshold when testing, and YOLOR as detection model. This method can reduce false positive results.
- Boost the final accuracy 2% by resizing the predicted bounding box to 87.5% of the original size.

Calendar Helper, Google *Aug. 2019*

Software Product Sprint Developer *[code]*

- A multifunctional Webapp for to-do lists and calendars.
- Using Javascript and JQuery as front-end and Java as back-end and host the Webapp on Google cloud console.
- Highlights: tagging system, nice dashboard design, synchronize with Google Calendar.

Honors & Awards

Presidential Honor Award - top 4% students (6 times), CSIE Dept. at CCU *Fall '17, Spring '18, Fall '18, Spring '19, Fall '19, Spring '20*

College Student Research Scholarship, Ministry of Science and Technology, Taiwan *2020*

Google Student Travel Scholarship, Grace Hopper Celebration *Oct. 2019*
